Housing Dataset

Data Set Characteristics: Multivariate

Number of Instances: 506

Attribute Characteristics: Categorical, Integer, Real

Number of Attributes: 13

Instructions :
1. Read the data using any suitable command in matlab.
2. The dataset consist of 13 attributes (features) and 1 Target variable (last coloumn)
3. The target variable is Median value of owner-occupied homes in $1000's
4. Use 70:10:20 ratio for dividing dataset into Training, Validation and Test datasets, respectively
5. Please look at this following link for further information :
